The third is admirably adapted for lubricating machinery, and contains—the 4th, Paraffine, which is nearly obtained by crystallization, and requiring but little treatment to make excellent candles. The 5th, Creosote, superior to animal oil or tar for the use of carriages. The 6th, Tar, perfectly black, very viscous, and which may be used generally for all purposes of tarring, and where materials for a superior—or any further information may be obtained either of Mr. W. C. HOMERSHAM, Retinite Works, Weymouth, or of Mr. C. F. CHEFFINS, 31, Southampton-buildings, Chancery-lane, London.
